NALENDRA PRAJA BREDTYOPATI YUDO

Associate of Computer Engineering from Politeknik Negeri Bandung with a growing focus on backend development, artificial intelligence, and data engineering. Hands-on exposure includes a backend engineering internship, a government web developer role, and multiple API, data pipeline, and full-stack projects. Seeking to contribute as an IT Developer while continuing to strengthen data-driven engineering capability.

EDUCATION BACKGROUND

Politeknik Negeri Bandung | Bandung, West Java
Associate of Computer Engineering | GPA 3.43 out of 4.00 | Aug, 2023 - Aug, 2026
Relevant Coursework: Database Systems, Data Structures and Algorithms, Web Programming, Mobile Programming, Software Engineering, Object-Oriented Programming

PROFESSIONAL EXPERIENCE

PT Neural Technologies Indonesia | South Jakarta, DKI Jakarta
Intern Backend Engineer | Jun, 2025 - Oct, 2025

- Developed and deployed RESTful APIs using ASP.NET Core (.NET 8) for web applications, supporting backend features in collaboration with the development team.
- Performed API testing, centralized documentation, refactoring, and bug fixing to maintain API reliability and consistency across services.
- Validated SQL queries against feature requirements to ensure accurate data retrieval and data integrity.
- Collaborated with the development team on task planning and implementation, contributing to consistent delivery of backend features.

Kementerian Pekerjaan Umum | South Jakarta, DKI Jakarta
Web Developer | Sep, 2026 - Present

- Analyzed business processes and translated requirements into technical solutions for the SIPSPSE monitoring application.
- Designed and developed database schemas based on system requirements, supporting structured data management and integration.
- Developed and documented REST APIs using Django for system features and integrations, ensuring consistent backend functionality.
- Designed user interfaces using React and integrated frontend-backend components with authentication and role-based access control.

ORGANIZATIONAL & VOLUNTEER EXPERIENCES

Komisi Pemilihan Umum Himpunan Mahasiswa Komputer | Bandung, West Java
Business Funds Division | Sep, 2023 - Dec, 2023

- Maintained accurate financial ledgers to systematically track and record all incoming and outgoing organization funds.
- Spearheaded brainstorming sessions to identify and evaluate profitable fundraising opportunities for the student organization.

Himpunan Mahasiswa Komputer | Bandung, West Java
Head of the Social and Community Division | Jan, 2024 - Dec, 2025

- Participate in community social activities and organizational committees.
- Engage in external activities such as alumni sharing sessions and comparative study visits

Forum Komunikasi Mahasiswa Subang Polban | Bandung, West Java
Vice Chairman | Dec, 2024 - Feb, 2026

- Initiated outreach programs at schools in Subang to introduce higher education and Politeknik Negeri Bandung to students.
- Facilitated and managed activities for POLBAN students from Subang, supporting communication and engagement among members.

PROJECT

Congklak Glory | Politeknik Negeri Bandung
CLI-based game using C and Linked List data structures | Jan, 2024 - May, 2024

- Developed a Congklak game using C and Linked List data structures to simulate traditional gameplay mechanics, including seed distribution, move validation, and win-condition tracking.

Library Based Application Development | Politeknik Negeri Bandung
Digital information security system in C++ | Jan, 2024 - May, 2024

- Built a C++ security application in CLI combining AES cryptography and LSB steganography to encrypt text and embed hidden messages within image files.

SPIP Polban | Politeknik Negeri Bandung
Web-based internal control system | Jul, 2024 - Dec, 2024

- Developed a SPIP application for Polban using Laravel and PostgreSQL to support internal evaluation and monitoring through assessment data management and dynamic charts and tables.

Schedo | Politeknik Negeri Bandung
Kotlin-based mobile task management app | Jan, 2025 - May 2025

- Built a Kotlin mobile application for task management with task creation, schedule tracking, file attachments, and automated notifications to support personal productivity.

Face Recognition Application | Politeknik Negeri Bandung
Web-based face recognition app | Jan, 2025 - Feb, 2025

- Developed a Python and Streamlit application using CNNs and ensemble learning for real-time face detection, age estimation, ethnicity classification, and similarity matching.

PoseLight Project | Politeknik Negeri Bandung
Web-based face recognition app | Apr, 2025 - May, 2025

- Developed a Python and Streamlit application integrating MediaPipe pose detection with Arduino hardware through serial communication to control LED lighting based on body movements.

Mini Project School Management System | Personal Project
.NET 8 backend mini-project | Jun, 2025 - Jul, 2025

- Built a .NET 8 backend for a school management system with strict role-based access control using JWT authentication, PostgreSQL, and Entity Framework Core.

International Roamer Project | PT Neural Technologies Indonesia for Telkomsel
Enterprise web platform for global network performance monitoring | Jun, 2025 - Oct, 2025

- Developed Inbound and Outbound dashboards using .NET and ClickHouse to process large-scale telecommunications data and visualize KPI and KQI metrics, with API testing using Postman to support rapid fault detection and service quality monitoring.

Fix Broadband Project | PT Neural Technologies Indonesia for Telkomsel
Fixed Broadband Executive Dashboard | Sep, 2025 - Oct, 2025

- Developed backend services using .NET 8 for Telkomsel's monitoring dashboard, supporting nationwide network infrastructure deployment tracking, regional progress data, and design lifecycle analytics.

Basketball Player Position Recommendation Application Using AHP | Politeknik Negeri Bandung
Web-based recommendation system | Jan, 2026 - Jul, 2026

- Developed a React and Laravel web app implementing the AHP algorithm to evaluate player performance metrics and generate data-driven position recommendations for coaching staff.

Mini Microservice Application | Personal Project
Backend microservices e-commerce simulation | Jun, 2026 - Jul, 2026

- Built a Spring Boot and PostgreSQL microservices backend application simulating e-commerce flows through separate Catalog and Order services with distributed system responsibilities.

Split Bill Application | Personal Project
Backend RESTful API for group expense sharing | Aug, 2026 - Aug, 2026

- Developed a Spring Boot REST API for group expense sharing, using a Greedy Algorithm to automate debt settlement and minimize the number of transfers between participants.

F1 Race Data | Personal Project
Automated data engineering pipeline | Aug, 2026 - Oct, 2026

- Built a Python data pipeline to collect, clean, and structure Formula 1 datasets from Kaggle into PostgreSQL with automated validation and ingestion for reliable analytics.

Formula 1 Race API | Personal Project
Backend REST API for F1 data | Aug, 2026 - Oct,2026

- Developed a FastAPI and PostgreSQL backend delivering championship standings, race schedules, pit stop data, and driver analytics with Swagger documentation and Postman testing.

Tifosi Application | Personal Project
Responsive web dashboard for F1 tracking | Aug, 2026 - Oct, 2026

- Built a responsive HTML, CSS, and JavaScript dashboard integrating with the backend API to display race status, timezone conversion, lap-by-lap charts, and 70 years of historical F1 data.

CERTIFICATION

Wadhwani | Course

- Employability Skills Wadhwani Certification

Microsoft | Course

- Foundational C# Microsoft Certification

ArutalaLab | Jul, 2026 - Jul, 2029

- Back-End Java Spring Boot Certification

ITC Indonesia| May, 2026 - May, 2028

- TOEIC Certification (Grade 655 out of 990)

SKILLS & LANGUAGES

Skills: Backend Development, Web Development, Object-Oriented Programming, RESTful API Development, Database Management, SQL, PostgreSQL, MySQL, C#, C/C++, Java, PHP, Python, Kotlin, React, HTML/CSS, Git & GitHub, Postman, Linux Server Deployment, Docker, CI/CD
Languages: Indonesian (Native), English (Intermediate)
